Reversible mini ratchet with 72 teeth for confined spaces
Full-fledged SoftFinish® screwdriver handle ensures ergonomic working
With 29 bits, 7 nut drivers, a screwdriver handle, ratchet, bit holder and adapter in a convenient ProBuddy® holder
Not having the right tool at hand when you need it can result in wasted time, especially when you are on the move. With 40 parts, the ProBuddy® can be universally deployed and offers the perfect solution for a large number of screw connections. This compact, lightweight and sophisticated bit set allows for easy handling, efficient work and quick storage and removal of the tools. Thanks to the fold-out function of the bit band, it is quick and easy to remove the bits using the push button on the side. The set includes 29 bits, which can also be used for machine operation, the seven most common 1/4" hex nut drivers in sizes 5.5 – 13 mm, a ratchet, a bit holder and a nut driver adapter, offering a wide range of equipment for installation and assembly work as well as for smaller repair jobs. In addition, the ergonomically designed SoftFinish® screwdriver handle ensures screw connections that are particularly easy to handle. Thanks to the 1/4" nut driver adapter, the nut drivers can also be used with this. This offers a wide range of

applications. The included ratchet, in combination with the selection of nut drivers, offers users the required flexibility for their work and, thanks to the fine toothing with 72 teeth, a short return angle. The right or left rotation can be variably adjusted by the integrated switch lever. Made of high quality chrome-vanadium steel, the cutting edges of the ratchet and nut driver are distinguished by their longevity and robustness, not the least thanks to their corrosion-resistant and easy to clean surface.
